

2.0 Environmental Policy Statement

The Company is a professional and environmentally conscious organisation, which acknowledges the impact that both our construction based and office-based operations may potentially have on the environment. The Company's clear objective is to minimise any impact on the environment by:

- Operating an Environmental Management System, that is constantly seeking to improve our environmental performance resulting in the conformance to the requirements of BS EN ISO 14001: 2015 standard;
- Taking progressive action to prevent, eliminate or reduce, all foreseen adverse effects to the environment that may be caused by any of our construction-based activities, and plan to avoid, so far as practicable, any potentially adverse environmental effects and impacts on the environment from any remaining processes including office-based operations;
- Regular monitoring of the Company's performance and the effect of controls in place, through the issue of KPI's, regular internal audits and regular inspections;
- Providing regular environmental awareness training for our staff with assessments in place to monitor their understanding. Provide further environmental training to tradesmen, operatives, suppliers, contractors and partners by implementation of the company operational procedures;
- Being committed to full compliance with all applicable legal requirements and best practice;
- Seeking to work in effective partnership with the community by behaving in a considerate and socially responsible manner during the planning and completion of all our company processes;
- Ensuring effective and expedient incident control, investigation and reporting to the required bodies whilst ensuring standards are resumed to meet best practice forthwith;
- Being committed to the open communication of our Environmental Policy requirements, objectives and performance throughout the organisation;
- This policy will be available for all those affected by our operations on the Company websites:
